

LUMINOUS COLOR

For use in safety decorative and building applications

Innovative pre-painted aluminium with a unique luminescent top coat

Relumed without a generator!

In case of a power failure Luminous Color provides an additional back-up support to the standard security arrangements such as standby generator sets. Imagine being trapped in an elevator when the power fails!

Novelis LUMINOUS COLOR ceiling panels are the optimal solution. They help to avoid accidents and panic and provide a good alternative source of light additional to the existing lighting system.

The new luminescent surface has been developed in several variations making them useful for many fields of application.

Properties

- fire rating A1 according to EN 13501
- high formability
- gauges from 0.2 to 2.0 mm
- increased abrasion resistance through "crystal coat" paint finish
- at least a full hour luminosity from a fully charged surface
- suitable for printing applications
- compliance with safety regulations according to Euro-Norm
- low cost and easy to recycle
- long term luminosity – can be endlessly re-charged
- suitable for outdoor applications
