

APEM's sealed pushbuttons - new I range Catalogue

APEM is pleased to announce the availability of a new switch catalogue, including all our sealed pushbuttons with dia. 12mm or 16mm bushing.

This 60-page catalogue highlights the following evolutions:

Illumination option on straight PC models

These 2 options were previously incompatible with the IP and IR series. APEM has developed a new manufacturing tool to make this option available.

UL approval

All IP-IB-IS pushbuttons are UL certified under 125VAC/250VAC with a 2 Amps current rating. This option is now available in the order guides.

IZ series

The range of IZ rear mounted sealed pushbutton switches keeps expanding with the introduction of new versions. Plastic and metal models, both momentary and latching are now available.

Custom configurations

2 pages are dedicated to custom configurations, showing our technical capabilities in this area.

This catalogue is available either as a pdf or in print.
