PRVC0

KIT CONTROL FLUJO VARIABLE DE AGUA

Novedad

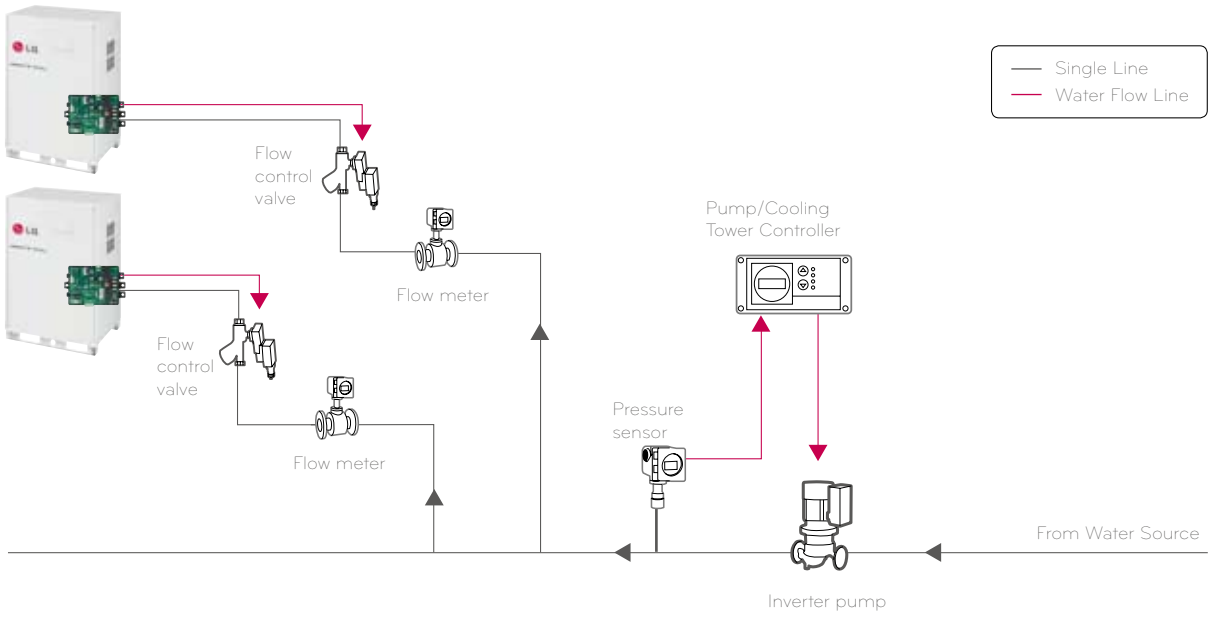

Accessory developed for controlling the water flow.

Características

1) Model name : PRVC0
2) Specification
   • Applied Model : MULTI V Water
   • Function
      - Water pump valve control (0~10V) -
      Minimum voltage setting available -
      Operation, error output (display)
   • Advantage
      - Water flow consumption reduction -
      Pump electricity consumption reduction
3) Description
   The product is specially designed to control the water pump valve in MULTI V Water system.

Esquema de instalación

• Flow control valve : Regulates the flow or pressure of a fluid, normally responding to signals generated by independent devices.
• Flow Meter : Measures mass flow rate of a fluid traveling through a tube. (The mass flow rate is the mass of the fluid traveling past a fixed point per unit time.)
• Pressure Sensor : Measures the pressure.
